

TED^x GMC DODA

^x = independently organised TED event

A dark stage setting with a prominent red laser beam cutting through the darkness from the top center. To the left, a large, white, gridded light fixture is angled downwards. The floor appears to be a dark, polished surface. The overall atmosphere is dramatic and high-tech.

WHAT IS TED?

Started in California 26 years ago, TED is a nonprofit devoted to spreading ideas, usually in the form of short, powerful talks (18 minutes or less). TED began as a conference where Technology, Entertainment and Design converged, and today covers almost all topics - from science to business to global issues in more than 100 languages.

ABOUT US

Government Medical College, Doda, a leading medical institution in the picturesque Chenab Valley of Jammu & Kashmir (Union Territory), stands as a beacon of quality education and compassionate healthcare for the people of this region. Nestled amidst the serene hills, it not only shapes its students into competent clinicians but also nurtures their holistic development through a variety of extracurricular pursuits. With a vision that extends beyond the boundaries of medicine, GMC Doda encourages intellectual exploration and inspires conversations around ideas that have the power to ignite change – in the true spirit of TED.

TEDxGMC Doda is where the dedication of budding GMCian doctors meets the global ethos of TED. This will be the institution's very first TEDx event – a milestone that reflects its commitment to fostering innovation, creativity, and forward-thinking dialogue. What sets the TEDxGMC Doda team apart is its composition of future healthcare leaders, determined to make a meaningful mark not only in the medical field but across diverse spheres of influence. The vibrant core team has been passionately curating a lineup of speakers who can inspire inquisitive minds to perceive the world through fresh, transformative perspectives.

SPEAKERS

Col Virendra Sahi Vrc

Meet Zaveri
